Why iON:

iON provides a comprehensive solution that addresses and simplifies your operating processes. From hardware, network to ERP iON is offered as a single service to pay-as-you-use model, allowing you to leverage the solution’s true potential at your business growth. iON ensures integration of all processes along with ease of use of the software.

Integrated solutions:

We offer single-vendor IT with a pre-integrated suite of business network, software and services. This eliminates wastage of time, reduces cost and connectedness. For example, if you are using CRM software along with a core ERP (e.g. Oracle HCM) and have a document management system (like SAP / GHRMS), we ensure that these solutions are interconnected and work as one. So for you it is simply one IT and not multiple applications.

Integrated applications:

Integrated applications that provide a comprehensive view of business enabling better decisions.

Enhanced Business Continuity:

To leverage the solution’s true potential as your business grows. iION ensures integration of all processes or any additional cost. Being in perpetual beta will get the upgrades without disrupting your business on user feedback and industry and statutory changes. You best practices. The software is constantly enriched based on user satisfaction and changes to the software. Additionally, you get the flavor of your business by picking and choosing what processes you need. Furthermore, the multilingual capability of the software allows you to customize the solution label names to read in vernacular languages (like Hindi, Marathi, Tamil etc) enabling users to learn and operate the solution with ease.

Automatic upgrades:

We continuously invest in our solutions to incorporate best practices. The software is constantly enriched with new feedback and industry and statutory changes. You get the upgrades without disrupting your business operations as any additional cost. Being in perpetual beta, we continuously invest in our solutions to incorporate best practices. The software is constantly enriched with new feedback and industry and statutory changes. You get the upgrades without disrupting your business operations as any additional cost. Being in perpetual beta mode ensures that businesses are kept up-to-date.

Redefine Your Operating Processes - The iON Way
programmes and unique execution patterns. The way we look at, ERPs like iON not only function as a delivery platform, but also as a solution which helps us in redefining our operating procedures with its design and functional competencies.

The Business

Profile: Kristu Jayanti College was set up amidst the backdrop of the vibrant city of Bangalore University and is recognized by the UGC. The college was founded in 1999, run by Bodhi Science and Management Studies, a non-profit organization of the members of St. Joseph Province of the Carmelites of Mary Immaculate (CMI). It is located in the heart of a campus of 8.4 acres with state-of-the-art infrastructure.

Key Departments: Departments of excellence within the college are Commerce, psychology, social work, life sciences and management studies.

Operations: Kristu Jayanti College (KJC) is run by Bodhi Science and Management Studies, a non-profit organization. There are approximately 21,000 students studying in KJC.

Situation

Business Issues

- **Attendance**: Tracking attendance is a task that involves manual data entry and time-consuming durations. To keep track of attendance in a college, we need a tool that can help us in minimizing such activities and provide a data-driven experience.
- **Admissions**: Manual admission processes involve repetitive tasks like collating applications, receiving payments, and handling different departments. The process needs to be automated for efficient handling.
- **Fee Collection**: The process of fee collection involves handling payments and preparing invoices. There is a significant need for an automated system to streamline this process.
- **Student Scholarship**: The process of student scholarships involves identifying eligible students and managing the scholarship data. An automated system can help in accurately managing such data.
- **Student Leave**: The process of tracking student leaves involves manual handling of data and maintaining records. An automated system can help in handling such data efficiently.
- **Automation**: The process of automation involves handling various tasks related to the college's procedures. An automated system can help in improving the efficiency of such processes.

IT Challenges

- Need for an integrated solution that can handle various aspects of the college's operations
- Lack of integration between various systems
- Need for an automated system to handle various tasks
- Need for a tool that can streamline processes

The iON Way

- **Time Table and Student Attendance**: To address the need for efficient tracking of attendance, iON provides a tool that can handle various attendance scenarios. The tool is designed to handle various types of leaves applied by students, including those for medical leave, examination leave, and any other type of leave.
- **Fee Collection**: iON introduces a professional system for handling fee collection processes. The tool is designed to handle various fee collection scenarios, including those related to scholarships.
- **Admissions**: iON provides a comprehensive tool for handling admission processes. The tool is designed to handle various admission scenarios, including those related to scholarships.

To summarize:

- **Automation**: iON is an automated solution that provides automated and enhanced business processes.
- **Relevance**: iON provides relevant parts of the software to handle various processes.
- **Scalability**: iON provides scalable solutions with low maintenance requirements.
- **Cost-effectiveness**: iON provides cost-effective solutions with real-time information.
- **Improved access controls**: iON provides improved access controls.
- **Integrated and enhanced business processes**: iON provides integrated and enhanced business processes.
- **Transparent and consistent data**: iON provides transparent and consistent data to reduce miscommunication.

To attract the students, the college stresses on the importance of attendance, which is a basic requirement for their parents to be informed in case of absence of their ward. In addition, there was a need to keep track of the parents' information, which was not possible with manual data entry. The college also wanted to streamline processes like application handling and fee collection, which were time-consuming and required a lot of manual effort. The college also wanted to automate processes like admission, scholarship, and fee collection, which were previously handled manually.

To address these challenges, the college decided to implement iON. The tool was designed to handle various processes, including attendance, fee collection, admissions, scholarships, and student leave. The tool was designed to be scalable, cost-effective, and integrated into the college's existing processes. The tool was also designed to be easy to use, with a user-friendly interface.

The college found that iON helped in streamlining processes, improving efficiency, and reducing the need for manual effort. The college also found that iON helped in automating processes, improving access controls, and providing transparent and consistent data.
programmes and unique execution patterns. The way we look at, ERPs like iON not only function as a delivery platform, but also as a solution which helps us in redefining our operating procedures with its design and functional competencies.

Our organization integrates diverse prime models of its kind we understand the challenge that iON has taken up, given our varied requirements. Our organization integrates diverse challenge that iON has taken up, given our varied requirements. Our organization integrates diverse challenge that iON has taken up, given our varied requirements. Our organization integrates diverse challenge that iON has taken up, given our varied requirements.

**Business Analytics**
- **Business analytics tool was required for improved decision making**
- **Lack of integration between fee collection and accounting module resulted in a lot of manual work which included posting daily collection in the book of accounts**
- **Business analytics tool was required for improved decision making**

**IT Challenges**
- **Need for a single integrated system that could negotiate all relevant data about students as well as faculty with necessary role based access controls**
- **Lack of integration between fee collection and accounting module which led to a lot of manual work which included posting daily collections in the book of accounts**
- **Business analytics tool was required for improved decision making**

**IT Challenges**
- **Need for a single integrated system that could negotiate all relevant data about students as well as faculty with necessary role based access controls**

**Feasible Solution**
- **The iON Way**
  - **Fee Collection**
  - **Admissions**
  - **Academics - Timetable**
  - **Discipline**
  - **Attendance Handling**
  - **Student Leave**
  - **Student Scholarship**
  - **E-forms - Online Application Management**
  - **Letter Printing**

**To summarize**
- **Automation leading to integrated and enhanced business processes**
- **Cost-effective solution with availability of real-time information**
- **Transparent and controlled data to reduce miscommunication**
- **Simplifies violation with less interventions**
- **Improved access controls**
- **Streamlined processes to enhance business processes**

**Human Resource Management System**
- **Front Office - Self Service Application**
- **Human Resource Management**
- **Letter Printing**
- **Discipline**
- **Student leave**
- **Report Generation**

**Integrating with iON customers**
- **It has been a wonderful experience interacting with iON crew members.**
- **The strength of iON is its ability to bring the collective ingredients in the same bundle.**
- **The evolution of iON is unique, which is in interacting and picking up the varied requirements from multiple organizations across the country including us.**
- **This will not only be a privilege but also a responsibility that Kristu Jayanti and its fellow institutions undertake in grooming a competent potential for the future...**

programmes and unique execution patterns. The way we look at, ERPs like iON not only function as a delivery platform, but also as a solution which helps us in redefining our operating procedures with its design and functional competencies.

The Business

Profile: Kristu Jayanti College was set up among the top 10 commerce colleges in Bangalore University and is recognized by UGC. It is located in the heart of the city and is one of the top 10 commerce colleges in Bangalore. The college is affiliated to Bangalore University, and is recognized by UGC. It is located in the heart of the city and is one of the top 10 commerce colleges in Bangalore. The college envisions the impartation of attendance, where a need is to have the parents informed in case of absence of their ward.

Situation

Business Issues

1. Attendance Tracking: Lack of a consolidated and accurate record for tracking student attendance.
2. Automated Admission Process: Manual handling of the Admission process which was time-consuming and replicated information.
3. Business Analytics: Reports were required to collate applications received and keep the system up-to-date.
4. IT Challenges
   1. Need for a single integrated system that could capture all relevant data about each student as well as day-to-day campus management and student transactions.
   2. Lack of integration between fee collection and accounting modules which led to a lot of manual work while it included posting daily collections in the books of account.
   3. Business analytics tool was required for improved decision making.

The iON Way

1. Time Table and Student Attendance: In addition to recording the time table and tracking attendance, the system defined various leave types a student can apply for, the defined approval workflow for various types of leaves applied by the student, and also logic to define whether the student is eligible for attendance on a certain type of leave being applied. The compiled attendance data can be collated and shared with parents and guardians. Using iON, the system defined various leave types a student can apply for, the defined approval workflow for various types of leaves applied by the student, and also logic to define whether the student is eligible for attendance
2. Applications: E-forms were integrated at the end to rid any lack of automation process starting from managing the concept and processing of online application forms. The process was streamlined and all forms went through a workflow. The case of absence of their ward
3. Fee Collection: The process was automated and streamlined which enabled the exercise to effectively manage fee, which was recorded in the system, to maintain a centralized data warehouse. The students can apply for the transactions, start date and due date for the collection

To summarize

- Automation leading to integrated and enhanced business processes
- Cost-effective solution with availability of real-time information
- Transparent and consistent data to reduce miscommunication
- Improved access controls
- Integrated and enhanced business processes

- Student Relationship

It has been a wonderful experience interacting with iON core members. The strength of iON lies in its ability to bring the collective intelligence in the same bundle. The evolution methodology of iON is unique, which is by interacting and putting up the several requirements from multiple organizations across the country including us. This will not only be a privilege but also a responsibility that Kristu Jayanti and its fellow institutions undertake in grooming a competent potential for the future…

Bino Joseph
Change Manager for iON Solution Activation
Why iON

iON offers a comprehensive solution that addresses all the requirements of your organization. From hardware, networking to ERP, iON is offered in a single solution in a pay-as-you-use model, allowing you to leverage the solution’s true potential at your business growth. iON streamlines integration of all processes along with near-use of the software.

You gain from:

Integrated solutions

We offer single-window IT with a pre-integrated suite of business systems, software and services. This includes packaged software with built-in security, configuration and connectivity. For example, if you are using iON solutions along with a pre-built ERP application tool and have a document management system for expense accounting and e-HRMS, it ensures that these solutions are connected and work as one. So, for you it is simply one IT and not multiple applications. Integrated applications that provide a comprehensive view of business enabling better decisions.

Increased agility

Working in the agile way to keep pace with changing processes or core of the business. With iON, you develop, deliver and deliver what you need, when you need it. And you can capture, test and update on the software environment and allows you to choose industry best practices based on your business parameters. The solution gives you increased convenience allowing you to perform various tasks from your mobile device, no matter where you are. Being automatically compliant with statutory requirements, the solution ensures your company is always audit ready and legally compliant.

A pay-as-you-use model

Our model optimizes capital investment up front so that you maximize the use of IT infrastructure and software even after the duration of the contract. Additionally, you only pay for the number of users who actually use the software. Thus, you pay just as you use it; a service is presently basic which includes maintenance and training. Typically, the TCO reduces within three months, whereas best practices are well followed.

Personalized solutions

Although ERP’s are cloud oriented, the software is configurable to each business. You will always get the flavor of your business by picking and choosing what practices you need (processed), and the multilingual capability of the software allows you to customize the solution’s interface to your vernacular language (Hindi, Marathi, Tamil etc) enabling users to learn and operate the solution with ease.

Automatic upgrades

We continuously invest in our solutions to incorporate best practices. The software is constantly enriched based on our feedback and industry and statutory changes. You will get the upgrades without disrupting your business operations or any additional cost. Being a perpetual beta, ensures that there is no technology obsolescence.

Redefine Business Continuity

The solution offers optimal performance in normal to downscend connectivity along with a managed security mechanism to ensure your data privacy is maintained. The capability of the solution grows with your increasing computing needs and reduces the need for IT staff. This is especially useful in states as the enterprise needs back-up data centers in the event of a disaster, ensuring continuity of business operations.

About TCS iON

TCS iON is a strategic unit of Tata Consultancy Services focused on Small and Medium Businesses, as well as educational institutions. We provide technology to enhance your unique IT-environment, offering an end-to-end solutions for the sector.

Enhanced Business Continuity

TCS iON caters to the needs of multiple industry segments, through innovative, easy-to-use, secure and integrated, business solutions in small or pay-as-you-use pay on pay-as-you-use business models. We aim our clients with the help of best practices gained through TCS global experience, experience enriched with SaaS, and delivery capabilities.
